

HEALTH SERVICES ACADEMY

MISSION: Through a science-based curriculum, the Health Service Academy promotes opportunities for students to develop knowledge and skills necessary to become ethical health advocates within their society.

OVERVIEW: Students in the Health Service Academy will develop foundational knowledge in the pursuit of careers in the health and advocate for a healthy lifestyle. Students will have opportunities to experience/explore careers in the health field; including but not limited to: doctor/physician, registered nurse, pharmacist, research, dental hygienist, laboratory technician, and a certified nurse's assistant.

Academy Members:
